

Test For Quality Assurance Candidate

Kindly follow the instructions below.

Kindly submit your test answer in deliverable documents by replying to the email.

A. Testing skill

In this task, we would like to see how familiar you are with the occurrence of bugs and the quality of your bug finding report.

Your Task: Find bugs as much as possible and write bug report documents.

Instruction:

1. Go to the ADMTC platform
2. Test any feature on the ADMTC platform.
3. Find bug as much as possible
4. Write the report of your finding in a proper format. Be as clear as possible. Use the best QA bug documentation method that you know or familiar with.

B. Analysis capability

In this task, we would like to see how you analyze a system based on various points (display, interface, performance, etc).

Your Task: Please provide your insight in terms of suggestions or ideas on how the system could be improved in any aspect you could think of. You are free to give any insights into the entire parts of the ADMTC.

C. Test Case Creation

In this task, we would like to see your ability in understanding the requirement, workflow, and how you would turn a requirement into test cases to find or prevent bug occurrence.

Specification Document: Task Management [Link](#)

ADMTC and user-used ADMTC platforms can create and assign tasks to other users. For example, creating a task to complete documentation of finance, etc and assign the task to someone.

Your task: Please provide test cases for testing the feature Task Management. Make the test cases to be as clear as possible and cover all cases that could happen on this feature.

NOTE:

- Please be clear when describing the test case. Use a test case documentation format that you know or are familiar with.

IMPORTANT NOTE:

- ALL Test result on Part A, B and C must be Compiled in 1 document as PDF format
- ALL Test result on Part A, B and C must be written in English
- In Creating the User, Do Not use the fake email. Please create an email address using <http://www.yopmail.com/en/>

How to create email in yopmail:

1. Open yopmail
2. In field "Type the Email name of your choice" enter text which will become your email address
3. Click on check inbox
4. Done
5. Copy your yopmail address and use it to create user
